ABOUT ME

Full Stack .NET Developer with 5+ years of experience delivering scalable, cloud-native enterprise applications using ASP.NET Core, Blazor, and Microsoft Azure. Recently applied an AI-driven Software Development Lifecycle (AI-SDLC) across requirements, coding, and review workflows using large language models, leading company-wide adoption of this practice. Strong track record in distributed systems, API design, and CI/CD automation, with experience mentoring engineering teams. Currently pursuing the IBM Generative AI Engineering certification. Open to remote or relocation opportunities across Europe.

WORK EXPERIENCE

AI Master Developer with AI-SDLC

Nov 2025 – Present

Contour Software, Islamabad, Pakistan

- Led company-wide adoption of an AI-driven Software Development Lifecycle (AI-SDLC), integrating large language models across planning, requirements, coding, PR review, and archiving stages for daily engineering workflows.
- Collaborated with AI tools to draft and refine functional and non-functional requirements as structured .md specification documents, iterating with stakeholders to align scope before development began.
- Directed requirement-finalization sessions using AI-generated documentation as the single source of truth, reducing ambiguity and rework between planning and implementation phases.
- Applied AI-assisted code generation and pair-programming workflows to accelerate feature delivery while maintaining Clean Architecture and SOLID standards.
- Incorporated AI-assisted PR review practices to catch defects and enforce coding standards earlier in the review cycle, complementing peer code review.
- Established a structured archiving process for AI-generated requirement and design artifacts, improving traceability and knowledge continuity across the engineering team.

Sector: Software / IT services

Full Stack .NET Core Developer

May 2023 – Nov 2025

Contour Software, Islamabad, Pakistan

- Engineered 3+ enterprise web applications using ASP.NET Core and Blazor (Server + WebAssembly, Radzen) serving 5,000+ concurrent users at 99.9% uptime, monitored via Azure Application Insights.
- Designed and documented 15+ RESTful APIs (OpenAPI / Swagger) with JWT / OAuth 2.0 authentication, API versioning, and rate limiting — reducing cross-team integration defects by 40% across 3 consuming teams.
- Built Azure Functions for serverless, event-driven workflows across 8+ third-party integrations, cutting infrastructure costs by 30% vs. always-on App Service hosting.
- Implemented Clean Architecture patterns across 3+ projects, accelerating new-developer productivity from 3–4 weeks to under 2 weeks (2x improvement) confirmed across 2 onboarded engineers.
- Established Azure DevOps CI/CD pipelines with automated xUnit / NUnit testing gates across 5+ environments, reducing release cycle from 2–3 days to 4–8 hours (70% reduction) with zero-downtime deployments.
- Led code reviews for 4 developers and mentored junior engineers on SOLID principles and Dependency Injection within a 12-person Agile/Scrum engineering team.
- Integrated Azure Service Bus, Redis Cache, and Cosmos DB for resilient, high-throughput distributed processing supporting 5,000+ concurrent users; applied Polly for retry and circuit-breaker policies, achieving 99.9% message delivery reliability.

Sector: Software / IT services

Full Stack .NET Software Engineer
Techneivity Inc., Islamabad, Pakistan

Jan 2020 – May 2023

- Delivered 5+ client-facing web applications (ASP.NET Core, HTML5, CSS3, JavaScript) across 3 client accounts, from requirements through production deployment.
- Designed and versioned 10+ REST APIs with OAuth 2.0 authentication and standardised DTO mapping, reducing client integration onboarding time by 50%.
- Automated CI/CD pipelines via Azure DevOps across 3 client environments, reducing manual deployment effort by 80% and establishing repeatable, error-free release processes.
- Championed unit-testing culture using xUnit and NUnit; resolved 200+ sprint-tracked bugs, improving defect escape rate across 2+ years.

Sector: Software / IT services

EDUCATION AND TRAINING

Bachelor of Science in Information Technology (BSIT)
Bahria University, Islamabad, Pakistan

Sep 2015 – Jun 2019

LANGUAGE SKILLS

Self-assessment based on the Common European Framework of Reference for Languages (CEFR)

Language	Listening	Reading	Spoken interaction	Spoken production	Writing
English	C1	C1	C1	C1	C1
German	A1	A1	A1	A1	A1

Levels: A1/A2 (Basic user) — B1/B2 (Independent user) — C1/C2 (Proficient user)

Mother tongue: Urdu

DIGITAL SKILLS AND COMPETENCES

Job-related technical skills

Languages: C#, TypeScript, JavaScript, SQL, HTML5, CSS3

Frameworks & Libraries: ASP.NET Core, Blazor (Server + WebAssembly, Radzen), .NET 7/8/9/10, Entity Framework Core, Dapper, LINQ, gRPC, Polly

Architecture & Patterns: Clean Architecture, Microservices, DDD, SOLID, Dependency Injection, RESTful API Design, Serverless, Minimal API, API Versioning

Cloud & DevOps: Azure (Functions, App Services, Cosmos DB, Service Bus, Redis Cache, Key Vault, Blob Storage, Application Insights), Azure DevOps CI/CD, Docker, Git

Security & API: OAuth 2.0, JWT, OpenAPI / Swagger, Rate Limiting, OpenTelemetry, Health Checks

Testing & Databases: xUnit, NUnit, Integration Testing, SQL Server, Azure Cosmos DB, NoSQL

AI & Emerging: Generative AI fundamentals, Prompt Engineering and Generative AI Development, AI-SDLC

Communication skills

Strong cross-functional collaboration built through direct client communication (Techneivity Inc.) and stakeholder-facing requirement discussions (Contour Software AI-SDLC workflows); comfortable presenting technical decisions to non-technical stakeholders.

Organisational / managerial skills

Led code reviews and mentored teams of up to 4 developers within a 12-person Agile/Scrum engineering team; directed requirement-finalization sessions and structured documentation/archiving processes.

TRAINING AND CERTIFICATIONS
